Welcome Webinars - October 2020 session

1. **Mathew 03:13 PM - Are there new SRMs to respond to our queries, considering the amount of new students joined this term?**

• *Hello Mathew, please be advised that we have a dedicated team of Student Relationship Officers who will be working through your enquiries. Once you log an enquiry, please be reassured that a member of the team will get to it as soon as they can. To keep things fair, we work through each enquiry in a strict date order. If your enquiry is urgent, then please do reach out to us, your Student Relationship Managers, via the Reach Out Forum, and we can then investigate this.*

2. **Ginaf 03:23 PM - Can we take level 4 courses and level 5 at the same time. like if we have 2 level 4 courses left, can we take 2 x lvl5 aswell**

• *Hi Ginaf, Yes, in some cases you can, however you must meet the following criteria:*
• You must have passed, or been awarded RPL, for at least 3 modules at Level 4, including Introduction to Programming I and either, Discrete or Computational Mathematics, and
• You must have made an attempt at least a further 3 modules at Level 4 (where applicable), including both Introduction to Programming II and the remaining Level 4 maths module, and
• You must register for any Level 4 modules not yet attempted alongside your Level 5 modules
Similar criteria applies for student wishing to register for L5 and L6 concurrently – refer to page 12 of the Programme Regulations.

3. **Aisha 03:26 PM - where can I find the reach out forum? Coursera?**

• *Hello Aisha, yes, the Reach Out Forum is located within the University of London BSc Computer Science Orientation Course.*

4. **Anuj 03:26 PM - Hello! I would like to mention that I have credentials necessary for a normal admission which i have gotten after I got in with Performance baed admission, Will I able to switch?**

o *Hello Anuj, If you would like to transfer from the Performance Based Admission route to the direct entry route, you would need to email us on BScCS-support@london.ac.uk and it will be sent over to the Admissions Office for consideration.*

5. **Anonymous Attendee 03:27 PM- How many students are there in total that are enrolled in this Bsc programme?**

o *Hi, Thank you for your question. We currently have approximately 3000 students currently registered on the October-March 2020/21 session.*

6. **Anuj 03:29 PM - Hello I have paid for 2 courses, i.e Discrete Maths and Intro to programing 1, between October and March, will I be able to finish the rest of the modules before October 2021.**

o *Hello Anuj, If you achieve a mark of 50% or above in the mid-term assessments for both modules under the PBA entry, you will be permitted to register for modules on the BSc programme in the next study session, April-September 2021, subject to any relevant progression rules. This means if you meet the requirements to progress onto the full BSc, you can then register for four new modules in the April-September session. More information about progression through the programme can be found in the programme regulations here - https://london.ac.uk/sites/default/files/regulations/progregs-computer-science-2020-21.pdf I hope this helps*

7. **Benjamin - It seems UoL has partnered with an online proctoring company called Janison. Do you plan to propose such a solution in the future for our examinations? Going to examination center is very expensive for some of us...**

o *Hello Benjamin, please be advised that the Assessments Office is currently in discussion with senior members of the University regarding how examinations will be conducted in the October 2020 session. As soon as procedures are confirmed, we will be sure to update you.*

8. **Anonymous Attendee 03:34 PM- For performance based admissions: are Intro to Programming & DM the only entry-level compulsory modules that need to be taken in order to progress with your BSc course or you can choose other options in the future for example if you'd like to take just one subject this term and another one (other than Intro to Programming and DM) next term?**

o *Hello, yes you are required to pass these modules in order to progress to the BSc. If you achieve a mark of 50% or above in the mid-term assessments for both modules, you will be permitted to register for modules on the BSc programme in the next study session, April-September 2021, subject to any*

relevant progression rules. This means if you meet the requirements to progress onto the full BSc, you can then register for four new modules in the April-September session. More information about progression through the programme can be found in the programme regulations here - https://london.ac.uk/sites/default/files/regulations/progregs-computer-science-2020-21.pdf I hope this helps

9. **Nsovo Thwala - Not sure if it's been disc 03:42 PM ussed already, but what happens if I cannot complete the degree in 6 years due to finances.**

- *Hello Nsovo, the maximum period of registration for a BSc programme is normally six years. You may request a one-year extension to your BSc registration. This will be granted at the discretion of the Programme Director in exceptional circumstances only and should be requested at the end of your final year of registration.*

10. **Moumita Barua Mou - Will 2021 March exams be online timed assessments?**

- *Hi Moumita, Please be advised that we cannot confirm just yet whether examinations will be held either in an examination center or online for the October-March 2020/21 session. However, all our exam assessments have been held online due to the current pandemic. Therefore, it is very likely the exams will be held online for the March exam session. Please rest assured we will be providing an update in the next few months.*

11. **Tailor Maciel 03:45 PM - Some students, including me, are struggling to register correctly for this session. Are we still be able to complete the registration?**

- *Hi Tailor we are sorry to hear that you experienced some technical issue with your online registration , if not already, can we ask you contact us at BScCS-Support@london.ac.uk, so we can assist further with your request. If you have already raised an enquiry, I will look into this matter on your behalf after this webinar.*

12. **Chuan - Hi Dear team: On the orientation course refunding section. The instruction says that student who wants to withdrawal from the program will get a full refund if he/she applies for withdrawal within 14 days of registering or 14 days before the first time he/she gets access to the studying material. We got our study material on the 12th of Oct. Does that mean after 26th Oct, whoever applied to withdrawal will not be refunded?**

- *Hi Chuan, Thank you for your question. Yes you are correct, if you do not contact us within the 14 days cancellation period Monday 26 October, your module fees are non refundable.*

13. **Anonymous Attendee 06:36 PM - After completing level 4 modules, are we allowed to apply for in-person BSc Computer Science in other UOL member institutions, or just Goldsmith?**

- *At the moment, the only guaranteed transfer is to on-campus Goldsmiths. We recommend that you contact the institution you have in mind to ask what the possibilities are there*

14. **Satyam kumar - sir, are the group discussion coursework going to happen live on zoom or in slack**

- *The group work interaction happens in Slack. Coursera is integrated with Slack and your team will have a private channel created for it automatically. There is nothing to stop you from organising meetings with your team in other systems such as Zoom though.*

15. **Moumita Barua Mou - Good Afternoon Sir, Can you pls tell me are PBA's allowed to Register for the final project along with other remaining level 6 modules or they are supposed to finish all level 6 module and then attempt for the final project?**

- *Once PBAs have passed the two level 4 modules permitted for PBAs, they can do everything any other student can do. So yes, they can take level 6 modules and project at the same time.*

16. **Anonymous Attendee 03:41 PM - Slack toxicity is brought by anonymous users and those who are no longer pursuing the degree. Would the uni consider enforcing people to display their names and pics and eject those who aren't part of the programme?**

- *Thanks for this comment. We will look into this suggestion*

17. **Wanwen Zhu 03:41 PM - what grade would be shown on the transcript for the courses being PRL?**

- *I don't know what PRL is. If it is RPL, that is a question for the admissions team.*

18. **Justin A 03:43 PM - What is the main difference between the degree if I'd like to finish it on campus and the one completed online?**

- *There are some variations in the curriculum and structure but they are both computer science degrees. It is mostly the experience of live in person interactions that you would gain on-campus.*

19. **Ali Turki 03:43 PM- I've applied through the performance based. I've selected one module only. Does that okay?**

- *We would recommend that you take two modules to ensure you can transfer onto the degree once they are passed.*

20. **Barry 03:44 PM - is there a different on the certification we receive eventually between study fully online and in campus study?**

- *They are both BSc degrees. One will be from University of London Worldwide, one will be from Goldsmiths, University of London.*

21. **Luis Rosal Benitez 03:44 PM - Hi, Luis Rosal from Guatemala in central america here. I got in trough the performance based admission route, I think that option is great. However I have a question. Since grades at the end of the term take a while to come in, assuming I pass, will I be able to register for the next modules in april, or will I have to sith that term and wait until oct2021 when grades for this term should be available?**

- *Yes - we have thought of this problem. If you gain 50% + in the mid terms, you can register for the next set of modules, as we expect you will pass overall if you can get 50%. (40% is the pass mark*

22. **elizabethpottsweinstein 03:44 PM - Where do we find out about live classes, where are they listed (on a calendar)?**

- *They are published in the all tutor group forums.*

23. **Anonymous Attendee 03:46 PM - Can we share our project code in a public repository like publicly in GitHub?**

- *Yes you can do this but there might be issues where other students use your code. We appreciate that people want to develop a portfolio though.*

24. **Alexis Corrieras 03:47 PM - The module How Computers Work can be waived if we have the Google IT Support Professional Certificate. If I have the Scrum Master Certification, do I have to take the Agile Module (Level 5)? Is there other modules that can be waived? Thanks!**

o *There are no other modules that we can waive at the moment.*

25. **Anonymous Attendee 03:48 PM - Are there plans to allow our degree to transition into the Goldsmiths 1 year MSci programme?**

- *If you complete the degree, you could potentially apply for the MSci.*

26. **Anonymous Attendee 03:48 PM - Is there a chance we might not get accreditation on the online degree?**

- *We will be working on accreditation once the degree is fully rolled out. Accreditation is not guaranteed as we do not control the process of accreditation.*

27. **Amy Tidd 03:48 PM -If you have opted for 3 modules in the first session and find you have the time to do a 4th, are you able to apply /pay for a 4th module during the same session? Thank you.**

o *I think you need to apply before the deadline which will have passed by then. Check with the admissions team.*

28. **Officer Meowington Carrot VI - Hypothetically speaking, if we took a year off, for example - would we have to let the uni know (respecting the 6 year degree limit)? Or do we just not register for those sessions without having to do anything?**

o *We will check this and confirm.*

29. **Anonymous Attendee 06:36 PM - After completing level 4 modules, are we allowed to apply for in-person BSc Computer Science in other UOL member institutions, or just Goldsmith?**

o *You can apply, but they will decide if you are accepted.*

30. **Luis Rosal Benitez 03:51 PM - I laso heard that the on campus degree had a Msc option available by studying an extra year, will that option be available to the online students in the future?**

o *We do not currently have an online MSc CS but we do have an online MSc in Data Science.*

31. **Anonymous Attendee 03:56 PM - I was reading about this today and it got me curious: does UOL use surveillance software to "spy" on students? If so, where can find info on data collected?**

o *I think you are referring to exam proctoring systems. We are not planning to use any exam proctoring for the BSc.*

32. **Barry 03:57 PM - is there a different on the certification we receive eventually between study fully online and in campus study?**

• *They are both BSc degrees. One will be from University of London Worldwide, one will be from Goldsmiths, University of London.*

33. **Gabriel Sobreira 03:58 PM - Will we be able to receive recommendation letters for a masters degree?**

• *We are in the final stage of setting this up. Watch this space.*

34. **Sunit Choithani - the projects cannot be posted on Github?**

• *We do not recommend that you post assessed coursework solutions on github. Your final project could go on there. The issue is not that we want to stop you from doing this but that we want to avoid students being able to submit your work as if it is their own.*

35. **Prashant - Not sure if this was asked. Is the degree same as the degree one gets at the campus? There are conflicting "opinions" online. I didn't come across it in any FAQ.**

• *They are both BSc degrees. One will be from University of London Worldwide, one will be from Goldsmiths, University of London.*

36. **Shivani M - Hey! Wondering if there are past papers we can access for our modules for practice?**

• *Yes - we either provide past papers if the module has run before or example papers if the module is running for the first time. They are normally provided in good time for the exam.*

37. **Gabriel Sobreira 03:58 PM - Will we be able to receive recommendation letters for a masters degree?**

• *We are in the final stage of setting this up. Watch this space.*

38. **Liz McCann 03:53 PM - I want to reemphasize the grading issue. FCS midterm results returned after the final exam this semester. I repeated mistakes that I would have not with proper feedback. Please can you set some real benchmarks for your grading team.**

▪ *Thanks for the feedback. We are in regular communications with the assessments team and are working to improve our turnaround times.*

39. **Barry 03:57 PM - is there a different on the certification we receive eventually between study fully online and in campus study?**

• *They are both BSc degrees. One will be from University of London Worldwide, one will be from Goldsmiths, University of London*

40. **what are the plans for next end-term exams? Please let students know 2-3 months in advance about the plan.**

• *Please be advised that we cannot confirm just yet whether examinations will be held either in an examination center or online for the October-March 2020/21 session. However, all our exam assessments have been held online due to the current pandemic. Therefore, it is very likely the exams will be held online for the March exam session. Please rest assured we will be providing an update in the next few months.*

41. **Is there a plan for a permanent online proctoring solution for future exams? Would be helpful for students who don't have an exam center within reach. In some countries, the exam center costs are prohibitive, nearly doubles the cost of the module.**

o   *Please be advised that we cannot confirm just yet whether examinations will be held either in an examination center or online for the October-March 2020/21 session. However, all our exam assessments have been held online due to the current pandemic. Therefore, it is very likely the exams will be held online for the March exam session. Please rest assured we will be providing an update in the next few months.*

42. **Regarding the degree certification, will it be issued by University of London or by Goldsmiths? Is it exactly the same than people on campus?**

•   *Hello Mauricio, Thank you for your question. Your degree will be of the same standard as a University of London degree awarded to an on-campus student by a college, Goldsmiths, University of London. Your certificate will carry the University of London logo and signature of the the Vice-Chancellor. It will indicate the award you have obtained and also show that the awarding body is the University of London with academic direction provided by Goldsmiths University of London. Please be aware that Coursera will not be noted on your degree certificate.*

43. **My name is Ibico from Lima, Peru. I got this far because I took the 2 UoL specializations at coursera, then I applied to the BSc programme. I had you as a teacher in various courses of those 2 specializations and you really impressed me as a teacher. My question is, as a students do we have only 3 or 6 years time frame to finish everything and graduate? What happens if I cannot finish by the end of the sixth year? I won't be able to graduate with a bachellor degree or I would be able to extend for longer my studies?**

o   *The maximum number of attempts permitted at any element of assessment is three. If your overall result for a module is a fail, you may resit any element of assessment for which you achieved less than 40%, provided that you do not exceed the maximum number of attempts. If you fail a module at the third attempt, your registration will cease and you will be unable to complete the programme. For further information regarding maximum period of registration and assessment within the programme, please see the Programme Regulations: https://london.ac.uk/sites/default/files/regulations/progregs-computer-science-2020-21.pdf*

44. **If we have already entered through performance based because we didnt have the certificates, but now we do, can we shift to the standard entry?**

•   *Thank you for your question. Can we ask you to email us at BScCS-Support@london.ac.uk and attached your certificates. Our Admissions Office will then be able to advise you if you will be eligible to transfer onto the full BSc.*

45. **Hello, Andrew from NewYork. Could you go into detail about performance base learning. After this first session how will things change after first 2 modules are passed.**

•   *Hello Andrew! Thank you for your question. If you achieve a mark of 50% or above in the mid-term assessments for both modules, you will be permitted to register for modules on the BSc programme in the next study session, April-September 2021, subject to any relevant progression rules. This means if you meet the requirements to progress onto the full BSc, you can then register for four new modules in the April-September session. More information about progression through the programme can be found in the programme regulations here - https://london.ac.uk/sites/default/files/regulations/progregs-computer-science-2020-21.pdf I hope this helps.*

46. **Responses from the bscs support email have been very slow in recent weeks, is there any particular reason for that, and are there plans to scale the support with the growth in student numbers?**

o   *Hi, we are sorry to hear that you have experienced delays in receiving responses from our support team. Please be assured that at this particularly busy time, when many students are registering for the October 2020 study session, your student relationship team are doing everything they can to get back to you as soon as possible, answering students in the order in which tickets have been logged. Thank you for your patience at this busy time.*

47. **Anonymous Attendee - Are there more SRMs to attend to our enquiries now, with 1200 new students this term ? SRM to students ratio sits at about 300:1 and we aren't getting answers to our BScCS-Support emails.**

o   *Hi there, thank you for your message. As our degree programmes grow, we are aware of how important it is to ensure we have the staff and resources to support our students across all our programmes. I'm sorry to hear you have experienced delays during this particularly busy period. Please be assured that, at this extremely busy time of registrations for the new October 2020 study session, and during the pandemic which has affected so many of our students across the world, staff are working hard to provide the best possible student support and experience to all.*

48. **kevine.london 10:33 AM- Since I am a student in the United States could I opt to take my examinations on the University of London Campus?**

▪   *Hello Kevine, Thank you for your question. Yes, students can sit their exams at any of our exam centres list on our webpage here.* https://bit.ly/37biWGe *As Matthew mentioned, it is very likely the exams will be held online for the March exam session. Please rest assured we will be providing an update in the next few months.*

49. **Anonymous Attendee 10:29 AM - Could we have some very clear guidance on what level of collaboration and online research is permitted for the non-programming (for example discrete maths, computational maths) midterms? There has been a lot of discussion of what is acceptable to explicitly discuss within Slack and ask on online forums, and some clearer guidance for the midterms would be appreciated.**

▪   *This is one for the assessments team. Is there a document on the induction course covering plagiarism and collusion?*

50. **Danny Callaghan 10:29 AM - Are there any plans to increase grading times? While waiting for end of module (exam/final project) grades are understandable and expected, it doesn't seem right that often a modules midterm grade is released after a module's exam or final project submission date. Those with jobs/kids/etc find a midterm grade invaluable to plan how much time/effort to give to that module (in relation to their other modules) going into the final few weeks.**

▪   *We are in regular contact with the assessments team and we are working to optimise the turn around time as much as possible. There is no plan to change the number of steps in the process however.*

51. **Anonymous Attendee 10:31 AM - How should we be preparing ourselves for the final project?**

▪   *We are working on the project module at the moment. We have received several requests for information about the project. We will release some details on the project as soon as we can.*

52. **Melissa Coates 10:32 AM- Does the Final Project (Level 6) take place over two semesters? Or is it double the work in one semester?**

▪   *The final project takes place over a single session, but it is worth 30 credits, double the amount of all other modules. Therefore, the expected study hours double to 300.*

53. **Remy George 10:32 AM - Can we select our specialisation of the degree after Level 4 or 5?**

▪   *You need to select a specialism at enrolment, but there is an administrative process to allow you to transfer later.*

54. **Cheska - For someone who totally comes from different degree, which module do you recommend best to start or in terms of chronological order to study so as not to get lost or overwhelmed with heavy lessons... say from level 4... thank you!**

▪   *I recommend starting with ITP1, a maths module, Web dev and how computers work.*

55. **yunus 10:34 AM- With the small errors in the videos that show up, is there any plan on fixing these quicker or is this something that won't be fixed soon**

- *Please report any errors you find in the videos. We have can then activate the workflow to then pass the fix request to the production team.*

56. **Denis Bee 10:35 AM - Could we select teammates in Web Development?**
- *The teams are presently assigned randomly within your tutor group. We cannot currently administer self-selected teams.*

57. **Alex & Chanel Wiesner 10:37 AM - Can we perhaps have live sessions with faculty in more modules? So not just maths modules? Also perhaps more regular tutor webinars?**
- *We have trialled live faculty webinars in maths, and we are keen to find out how you felt about it. We observe an attendance rate at live webinars between 0 and 10% of the cohort presently. We'd be keen to know how we can increase that.*

58. **Anonymous Attendee 10:40 AM - If you are performance based and you do well in your midterm will there be a method to finish all of level 4 in one year (i am aware that currently you can only take 4 modules at a time)**
- *This is not possible at present.*

59. **Marco 10:41 AM - I have read on Slack that some University (US based) might not accept this degree for pursuing a Master degree because it lacks the level of math they require. What was the reason why this course has left Calculus (or more advanced math courses) out? Do you have any advise on how we can integrate more math studies to better equip ourselves for pursuing a Master degree?**
- *We appreciate this feedback and we are considering how we might add more advanced maths content to the degree.*

60. **Ipsita Sarkar 10:42 AM - Thank you SRMs for the answers. If I may add to the recurring question about module content: some concern is not only about group work, but also the video content. Some modules/module leaders are more natural on video than others and that may be one of the reasons for feedback on content. Maybe some of the modules could benefit with less video content and more hands on programming exercises or other interactive content to meet the learning objectives?**
- *We appreciate this feedback. We are looking into how we might iterate on the modules for our next phase, once we have completed the development of the degree.*

61. **Ivo 10:42 AM - Additionally I wanted to ask if we can choose our specalization during the second year of our studies**
- *You need to choose when you enrol, but you can transfer later.*

62. **Darren N 10:43 AM - Good morning. Can students who have already passed Discrete Maths access and attend the live webinars that are available this semester?**
- *In theory, yes if you can access the links.*

63. **alex - Are there any futher plans to relax progression rules this academic year?I cannot move on to level 6 next semester, even though I will have completed 4 level 5 modules. Is there any flexibility there/**
- *I recommend checking the regulations about this. We are not planning to change those.*

64. **Hena Adlakha 10:47 AM - Feedback: Please consider adding more maths-focused modules to the program. We would need the extra maths for admission to a postgrad university**
- *We appreciate this feedback and are considering how we might add more advanced maths to the course.*

65. **Daniel Diaz 10:48 AM - Any plans to expand the degree to MSci level as you did already with the on campus programme?**
- *We are not presently planning this, but we have received this request from a few students. We do have an MSc Data Science online however.*

66. **Andrew Chisolm 10:49 AM - I keep getting confused between statement I read online. Is the degree a normal university degree or is a certificate? I just want clarification please.** *It is a Bachelors degree. If you complete all three levels, you will receive a degree. If you exit after*

level 4, you will receive a Certificate in Higher Education. If you exit after level 5, you will receive a Diploma in Higher Education.

68. **Bharat - Is there a possibility of changing specialism when starting with level 5?**
▪ *Yes you can transfer.*

69. **Anonymous Attendee 10:58 AM - Throughout studying the web dev module, I found team work being very difficult to organize. E.g., different time zone, different level of willingness to participate, different skillset - all this turned the work into kind of a nightmare. Is it possible to always have an option to do any project alone without involving or being involved in any sort of team work?** *We appreciate this feedback and we have worked on the group work model in collaboration with Coursera to try and improve the experience.*

70. **Petra 11:02 AM - Will we get 1-on-1 tutoring for the final project?**
▪ *We have not finalised the final project tutor model but we will ensure it is appropriate to allow students to complete the project to the standard required.*

71. **Steph Diamantopoulos 10:31 AM - Bit of an administrative question : for those of us in PBA , will we be able to register for the April 2021 session modules (before the 15th march deadline) even though we probably won't have our grades from the first semester ! Thanks**
▪ *Hi there! Please note if you achieve a mark of 50% or above in the mid-term assessments for both modules (ITP1 and Discrete Mathematics in the current October 2020 session), you will be permitted to register for modules on the BSc programme in the next study session, subject to any relevant progression rules.*

72. **Anonymous Attendee 10:47 AM - For the written exam for level 4 which will be held on March, should I contact to the exam centre or UOL?**
▪ *As Matthew mentioned, it is very likely the exams will be held online for the March exam session. Please rest assured that we will be providing an examination update in the next few months.*

73. **Melissa Coates 10:30 AM- You say that we need to contact the SRMs if the Tutors don't reply. What so we do if the SRMs don't reply? It takes weeks to get a response.**
• *Hi there, we are very sorry to hear you have experienced delays in receiving responses to your queries. Please be assured that at the particularly busy time when many students are registering for the October 2020 study session, your student relationship team are doing everything they can to get back to you as soon as possible, answering students in the order in which tickets have been logged. Thank you for your patience.*

74. **Estian Liebenberg 10:33 AM- Hi, should we have received the mail from ISIC (student card) already? Or is it expected 2 weeks after the course start?**
• *Hi Estian, thank you very much for your message. If you are still experiencing difficulties with this, please could you log an enquiry via the 'Ask a question' link in your student portal so that we can direct your query to the appropriate team? Best wishes.*

75. **Denis Bee 10:23 AM - Do you plan to add more SRMs and train them to read the messages and not just reply with thoughtless responses telling me that it's my problem and I have to register "as soon as possible", and getting back in touch after writing that they'll be "back in touch soon"? My student records were broken and I could not register for this semester, was trying to get support since August, 2nd for over two months (unsuccessfully), and finally got registered only after I called your office out of despair.**
• *Hi Denis, thank you for your feedback. I'm sorry to hear you experienced delays and technical issues at this extremely busy time, and we note that there were some difficulties for students registering in this October session. Please note that our teams have been working as quickly as possible to ensure that all students who logged enquiries before the registration deadline were able to complete registration and access their modules. Please be assured that, at this busy time of registrations for the new October 2020 study session, and during the pandemic which has affected so many of our students across the world, staff are working hard to provide the best possible student support and experience to all.*

76. **Matt- Why was the sits enquiries system replaced with BScCS-Support email?**
- *Hi Matt, thank you for your question. Once students are fully registered on the programme, the portal updates and the enquiry system is replaced by the BscCs email as the BSc Computer Science is being run in collaboration with Coursera, and this is the platform used by Coursera.*

77. **Petra 10:35 AM - Performance based admission students don't have a chance to gain the 45 points in passed exams in their first semester, which halts them from moving on to Level 5, even if they do 6 modules in their first year (but still waiting on grades of 4 modules). And then they are stuck. The only way is to take Google cert instead of HCW, which pushes people away from choosing the UoL module. Maybe reconsider the progression rule?**
- *Hello Petra, thank you very much for your valuable feedback. We will ensure this question regarding progression through the programme is passed on to the Programme Team for their consideration.*

78. **Anonymous Attendee - There are students who still haven't been able to register for modules this term because of the broken registration system. Have they been abandoned by the uni?**
- *Hi there, I'm very sorry to hear you had issues registering for the current session. Please note that as there was an extremely high volume of enquiries, our teams have been working as quickly as possible to ensure that all students who have logged enquiries before the registration deadline are able to complete registration and access their modules as soon as they can. Please be assured that we want all of our students to receive the best possible student experience and we appreciate your patience and understanding in these very busy times.*

79. **Anonymous Attendee 10:49 AM - Could you talk about the average age and gender split of our cohort?**
- *Hi there, thank you for your message! We do not currently have official information on this, however from recent student lists we can confirm that the average age lies somewhere between 25 and 35, and roughly 70-80% of student appear to be male. Please note, however, that all students are welcome on the programme!*

80. **Anonymous Attendee 10:38 AM - About transfer to on-campus, can we shift to on-campus for Year 3 as long as we complete Year 1 and 2 modules, or is there a time limit?**

81. **Abdirahman Suldaan 10:44 AM- If transferred on campus teaching I would assume that I would be subject to campus fees home/international.**

82. **Anonymous Attendee 10:45 AM- what if we wanted to shift on campus after level 5 modules, and only do level 6 at campus? Is that possible?**

83. **Tanha Ahmed Prithila 10:51 AM - Is it possible for us to shift to on-campus for level 6 modules as long as we complete level 4 and 5 modules?**

84. **Anonymous Attendee 10:49 AM - If you have been performance based and finish L4 how do you integrate if you switch to on campus, will there be a 6 months delay or how does it work? -**

85. **yunus 10:52 AM - With the transfer on campus, since our results come out after the transfer period, what would the advice here be.**

Questions 80-85:
- *Hello all, to complete your degree in two years of full-time study at Goldsmiths, you must have completed eight Level 4 modules successfully. To complete your degree in one year of full-time study at Goldsmiths, you must also have completed eight modules at Level 5. If you are interested in transferring to Goldsmiths and have successfully completed the required courses (or expect to do so in your intended year of transfer), please contact the on-campus Computing Team at uolworldwide-programmes@gold.ac.uk*
